To,

The Secretary to the
Government of Mysore

Sir,

(32) In reply to your docket No. K 10301 / R.F.103-92, dated the 23rd ultimo, I have the honor to forward, herewith, copy of docket No. 256, dated the 2nd instant, from the Deputy Commissioner, Kadur District, reporting the experiment made in sowing date seeds along the margin of tank beds, and what he now intends.

I have the honor to be,

From The Deputy Commissioner
Kadur District

To The Excise Commissioner
in Mysore

Dated 2nd June 1896.
No. 256.

Enclosure

Sir.

With reference to your memorandum No. 4842-49/247 dated 28th/29 ultimo, I have the honor to state that date seeds were sown as an experiment, along the margin of tank beds in this District, but owing to the long drought, and damage done by cattle this experiment has proved a failure. I now propose to sow seeds in small portions of tank beds and fence them in from cattle for one year, as I think that, should the seedlings get one year's start they will be able to hold out against cattle, etc when any small area may be tried.

I also intend sowing seeds on

on the steep banks of nullahs, where the seeds will obtain a certain amount of moisture, and be free from cattle to a certain extent.

(Sd) H. H. Sparkes
Deputy Commissioner
Kadur District.

Excise Commissioners Office.
Bangalore dated 15th April 1897

From

The Excise Commissioner
in Mysore

To,

The Secretary to the
Government of Mysore
General and Revenue Departments

Sir,

36 I Inreply to your docket No. 10823 - R.F.103-92 dated the 12th June 1896, I have the honor to state below the substance of the reports received from the Deputy Commissioners of the various Districts regarding the progress made in sowing date seeds along the margin of tank beds, on the banks of streams, water courses, &c: —

1. Bangalore District. In the talucks of Nelamangala, Bangalore and Doddaballapore efforts were made last year to sow date seeds in tank beds. The results however, have not been very satisfactory.

2. Kolar District. The dibbling of date seeds

seeds through the agency of Patels has been carried out to a certain extent in some of the tank beds of the Malur and Bagepelly taluks, and they are reported to have sprung up and to be in good condition.

3. Tumkur Distract. In the taluks of Gubbi and Kunigal date seeds were dibbled. About 3000 in the former and 12000 in the latter have germinated, and the plants are in a faire condition. In the Tumkur taluk only about 200 seeds germinated. Every endeavour is being made to raise date plantations in suitable localities with as little cost as possible.

4. Mysore Distract. Seeds were sown in the Hunsur, Gundlepet, Nanjangud, T. Narsipur, Seringapatam, Malvally and Krishnarajepett taluks, but they did not germinate for want of timely rain.

5. Hassan Distract. Date seeds were sown in tank beds and on slopes,

of

of buds in the taluks of Hassan, Holé Narsipur and Arkalgud. The seedsh have germinated and the plants in most cases are in fair conditions. If the latter rains had not failed, better growth would have been hoped for.

6. Kadur District. Date seeds were sown as an experiment along the margin of tank beds, but owing to the long drought and damage done by cattle, they did not germinate.

7 Shimoga District. The experiment has not yet been tried.

8. Chitaldrug District. Only in the Jagalore taluk the system of dibbling date seeds on the banks of nalas, jungle streams, tank beds, &c was tried, but few seeds germinated for want of rain.

E. The current year, as well as the past year, in which periodical rains failed, has not been favourable to the dibbling of Date seeds. Orders have been issued to the Deputy Commissioners to get large quantities of

Date

Date seeds collected and dibbled during the approaching South west Monsoon.

I have the honor to be,

Sir,

Your most obedient servant,

J. Duncan

Excise Commissioner

in Mysore

Read 294 (48) "

Letter No. 5355 dy 15 April 1897, from the Ld Commr in Mysore reporting upon the progress made and the results attained, with respect to the sowing of date seeds in the several districts of the province.

No. 10588 dy: 376 8/31/5/97 Order thereon

SECTION S/A

FILE No. 100/25-16

SER'AL No. 27

Received with the observation that the results of the experiments have not so far been very encouraging.

2. In future, every care should be taken that good seed is collected and sown in proper season in suitable localities. This work is expected to be done by the local excise Officials themselves, with the help of the village Patels, and should on no account be thrown on the Revenue Officials. With the large excise establishment now maintained, and provided the higher subordinates ~~exercise~~ exert themselves properly, Govt see no reason why a fair amount of success cannot be achieved

Without any extra cost. ?

This maybe printed ?
